

# PEDESTRIAN GATEWAYS

***Reminder: STOP for People Walking!***

The **City of Casselberry** has set a bold goal to become the most walkable, rollable, and bikeable City in Central Florida by 2040. To help achieve this goal, the City is focusing on the safety and comfort of pedestrians. This includes partnering with Bike/Walk Central Florida's **Best Foot Forward Program** to provide education, enforcement, and engineering enhancements at crosswalks.

One low-cost engineering tool toward this effort is the “pedestrian gateway” treatment.

The City is piloting use of a pedestrian gateway on **Crystal Bowl Circle at the Casselberry Elementary School** entrance, scheduled to be installed mid-April 2022. There are two main features to the gateway:

- **SIGNS REMINDING DRIVERS TO STOP FOR PEOPLE IN THE CROSSWALK** - Signs like that pictured to the right will be placed on the centerline and in the gutter of the roadway.
- **STOP BARS TO TELL DRIVERS WHERE TO STOP** – When pedestrians are present, stop behind these thick white lines until they finish crossing. In some cases, stop bars will be just a few feet from the crosswalk (as shown above), but in other cases they may be on the other side of the intersection.
